NUMBER 18

Wage And Salary Controls

Control over wages and salaries is as basic to the wartime economy of Canada as control over prices. The two are inseparably linked.

An increase in labour costs is one of the items in the structure of increased costs that leads to increased prices unless kept under control. Under inflation prices rise faster than wages and salaries, so that with the increased cost of living the worker is actually receiving less, even though wages may be higher.

There are many reasons for increased labour costs. Some of them are unavoidable. The use of inexperienced labour, absenteeism, and a high labour turnover all lead to an increase in costs of production. In addition, an increase in wage rates without a corresponding increase in labour efficiency will raise labour costs.

When wage and salary control were instituted, two things had to be realized. First the fact that the cost of living had been rising sharply for some time, made it unfair to freeze wages at an arbitrary level without at the same time taking other measures to check the rise in the cost of living. Secondly, there were many obvious inequities in the scale of wage rates in various sections of the country and in different businesses.

For these reasons control of wages could not be too rigid. Wages were placed under control late in 1941. To provide for increases in the cost of living, the Wartime Wage Control Order provided for the payment of a cost of living bonus in addition to wages, and based on increases in the cost of living index. When the Wage Control Order was revised in December 1943, it provided that the bonuses should be incorporated into basic wage rates as from February, 1944. Basic wage rates cannot now be increased except on the authority of a War Labour Board in special circumstances. But if the cost of living index rises by more than 3 per cent in twelve months, the government has promised to review the whole program of price and wage control and take appropriate action.

Provision was also made for settling the other problems of inequities & injustices. Although no wages can be increased without the approval of a War Labour Board, the Boards are empowered to make adjustments in cases of injustices. Labour is represented on these Boards.

Salary control has been as strict as wage control. Under the Wartime

CHRISTMAS GIFTS FOR OVERSEAS FORCES

15 SEPT.—25 OCT

"Do you open until Christmas?" That exciting phrase should be making its appearance in every mail despite the fact that many places in Canada are just recovering from the hottest spell on record. Postmaster General William P. Mulholland said that it is their job to make plans for Christmas gift parcels to members of the Armed Forces Overseas. The Christmas mailing period this year is

SEPTEMBER 15—OCTOBER 25. Naturally parcels sent to those serving in the more remote theatres of war should be sent the earliest. Suggested mailing dates are:

September 15—The Far East, India, Burma, Ceylon, etc.

October 5—The Middle East area—Egypt, Iran, Iraq, Syria, etc.

October 10—Central Mediterranean Forces.

October 25—The United Kingdom and France.

In view of the rapid progress of the war these dates might possibly be subject to change.

THURSTON SMITH HOME

P. O. Thurston Smith after 22 months operational flights in North Africa and Gibraltar, arrived home Wednesday evening and will spend a month here before returning for duty. Elder Sidney B. Smith who has been in the Western Canadian Mission for seven months past, will also be home this week and there two will be the speakers in the 2nd Ward Sunday evening.

Immediately after the meeting a welcome home and testimonial will be held for these two under the direction of the Missionary Committee and all ward members are invited to attend.

Mr. and Mrs. L. H. Jacobs were host and hostess to the Social Studies graduates of Grade XII at their home on Monday night last. A chicken supper was served on the lawn with all the trimmings. A bon fire was lighted and a sing song enjoyed for several hours. Everyone had a very enjoyable evening.

Salaries Order salaries were frozen at rates in effect in November, 1941. Salaries cannot be classified to the extent that wages can. Therefore the latitude allowed wage earners to advance without permission from one job to a higher paid one, if qualified, or to the top of the range of rates for a job, has not been allowed the salaried worker. Salaries can be adjusted only for promotions involving added responsibilities and increased duties in individual cases, or under special circumstances.

It has been estimated that there has been an increase of 25 per cent in average weekly earnings since June 1941, the earliest date for which it has been possible to make an estimate. This increase has been partially offset, of course, by higher income taxes and the increase in the cost of living.

The whole point of the government's stabilization program is to keep earnings at a level that will not lead to inflation. The co-operation of the worker in supporting every measure of price and wage control is essential to the plan. By milking expenses these pockets during her with other groups in a common effort to keep the cost of living down. Sunday at 12:15 p.m. over the CBC network of the CBC.

Lions Character Ball Grand Success

The Lions Dance held last Friday night in the Opera House was an outstanding success in every way. A light rain Friday morning tied up harvesting operations so that every one was free to come to the party and they really came in numbers to fill the Opera House to the doors.

The costumes were many and varied and showed a lot of originality on the part of the wearers. The first prize for men's costumes went to Art Jensen dressed as an Indian, Chief. There were clowns, cats and what not, and we are told that the cat even made the raise of a couple of kittens during the course of the evening.

The drawings for the wall drops and the big box of candy were full of interest until the winning number was announced and the sale of the other boxes of candy and the awarding of other prizes filled the dance with interest from the beginning to the end. The orchestra was on hand with hitting rhythm and kept every one occupied throughout the evening. The Lions are appreciative of the big support they received and they expect to have more than \$300.00 from the dance to turn over for equipment for the new Hospital.

LIONS MEETING

The regular meeting of the Raymond Lions Club was held in the usual manner.

2nd Ward Monday Sept. 4th with Pres. Ralph in the Chair.

The meeting opened in the usual manner with Sec. D. Rolfsen offering the prayer.

Sec. Rolfsen reported that the net amount made from the Character Ball amounted to \$362.11. The members were very pleased with this report and a vote of thanks was given the Committee (Lion J. McClean and H. Fairbanks) who had charge of this successful dance.

Richard Heitinger sang the "Song of Liberty" and for a second number "Coming in on a Wing and a Prayer." Many thanks Richard. Come again.

Lion Harry Fairbanks reported that he hoped by the time all the donations were in that a net sum of \$400 would be realized from the Character Ball.

It was decided to make the next dance Sept. 18 a Ladies night at which a Banquet would be held in the 2nd Ward Hall followed by a party and dance in the Opera House. The time of the Banquet was set for 8 p.m. instead of the usual time of 7:30.

Community Singing was enjoyed by all under the leadership of Lion T. Allan.

It was decided to sponsor a Lions Club at Warner in the near future. The meeting closed in the usual manner.

NEWS NOTES

Buy War Savings Stamps regularly.

The Mutuals had charge of the Sunday evening programs last Sunday night in both Raymond wards and put on very interesting programs in both.

The marriage of Miss Mae, daughter of Mr. and Mrs. Nelson Lefkowitz of Raymond and James A. McMahon, son of Mr. and Mrs. Geo. McMahon of Wilson Sliding is to take place Wednesday, Sept. 20th in the 1st Ward Church, Raymond.

LAC Grant Javis, son of Mr. and Mrs. Chas. Javis of Lefkowitz and Miss Mildred, daughter of Mr. and Mrs. Ira McBride, are being married in the Cardston Temple next Wednesday, the opening day of the Temple this season.

Miss Barbara Schneider, after a month's visit with relatives in Salt Lake City returned on Wednesday by plane in a little less than six hours. She was accompanied by her cousin Barbara and son Michael who are visiting here with relatives for a month.

Mrs. Geo. Erickson, our local egg grader spent a week recently in Lethbridge at an egg grading school freshening up on the fact that eggs are coming to come in and the outlook for the winter season is good. Lethbridge prices are paid for all grades locally.

A moose team ran away Wednesday morning and caused a little excitement, but no damage. They started from back of the Mere. lumber yard, circled the block down past Dr. Madill's, between the front of the lumber yard and two parked trucks and a telephone pole and were headed back into the alley again and caught. Some lumber and a telephone pole were scattered around but no further damage.

Showers are being held Friday evening next for Miss Hazel Boyson in the 2nd Ward and Miss Mildred McBride in the First Ward.

A shower is being held Monday night for Miss Margaret Dahl, daughter of Mr. and Mrs. Rhonda Dahl who is being married on Wednesday Sept. 13th to Jerry Leishman of Magnolia, the wedding to take place in the Cardston Temple.

SPECIAL INTEREST FIRES DE

The Special Interest Group of the 2nd Ward Mutual held a Fireside at the home of Mr. and Mrs. J. H. Walker last Sunday night after meeting which was attended by about 50 people. Community singing was enjoyed under the leadership of Delbert Oler and a lot of the old favorites were enjoyed. Mrs. Lucy Stevens gave a very interesting reading, and the remainder of the evening was spent in conversation and refreshments. A very enjoyable time is reported.

JOE CITIZEN SAYS—

I'd surely like to pack my grip and start off somewhere on a trip. This family would like it too—this "staying put" the whole year through gets tiring. Folks do like to range in pictures new and have a change.

For health's sake there is none denies a holiday is often wise.

Morale it certainly improves and gets us out of ruts and groove. But this year home's the place for us—we all agreed without a fuss. Our wanderlust we would restrain and clutter up no crowded trails.

Resides the money we would spend on holidays we ought to lend to help to make the war bond drive a success. And we'll all survive although we never idly roam until the troops are safely home.

School Board Banquets High School Graduates

SHE'S A MOTHER TO ALL SERVICE BOYS

There's a little mother we all know well, Her name my friends, I need not tell. There's never a service boy rich or poor But that is not welcomed at her door.

She has four sons fighting, for country and King, Her burden of heartaches is no little thing. Of worldly riches she is quite poor But her reward and blessings are still in store.

She mothers them all these service boys And in her own sweet way, she brings them joy. She greets them all with a firm hand clasp Of their social standing she does not ask.

Some folks have gained both rank and fame But there are few who know her name. Of her many kindnesses, she does not brag Or the joy her motherly actions bring.

For each of her own dear service lads, There'd be ninety and nine if he'd way she had. To these many lads so far from home She's looked upon, as a queen on a throne.

How many mothers are there today For aught but her own, would give out of her way, To these camp weary lads she brings each joy As she longs to do for her own dear boys.

Our own dear son she has not missed For he is on her family list. I'm proud to own her as my friend On her, may God's blessings have no end.

At the Taylor Stake House on Thursday evening, August 31st, the School Board were hosts to the Grade XII graduating class in a lovely banquet and program. The wives of the School Board members prepared and served the supper which included chicken, dressing, gravy, vegetables of all kinds, dessert. Everyone had all they wanted and some of them more.

H. Myron Holmes, School Board Chairman was Master of Ceremonies and following the supper conducted the following program:

Stako President T. Geo. Wood spoke to the graduates and encouraged them in their future and praised them for the work they had accomplished in their school studies. He stressed the value of integrity and application to duty as a means of success in life and hoped the years ahead for these graduates would be crowned with success.

Principal J. H. Jacobs gave a toast to the students and Abraham Kabayama replied for the students. Miss Kathleen Holmes sang a vocal solo and the students were asked to tell what they hoped to follow as a trade or profession in life. Many hopes for doctors, lawyers, engineers, nurses, etc. were expressed and one of the students brought down the house when he said and some of us are "going to the dogs."

The party was an outstanding success and a fitting climax to a very successful year's work. As 100 per cent of the Grade XII passed their subjects. It is hoped to make this banquet an annual event which will look forward to by the students of Grade XII throughout their year's work.

Now do take heed you service lads Remember her deeds are good, not bad, To her faith and trust you should prove true. An do to her, as she's done by you.

God bless these boys and bring them home, As she would have. You bring her own, Upon this land. You men suppose, Our God, Our Savior, and our King. —Mrs. Oscar Johnson

OUR WATER SYSTEM

Maybe we are dragging a skeleton out of the closet when we mention our municipal water system, but in our opinion this is the time of the year when the situation should be viewed with a view to making some improvement before spring and summer comes next year. The present system has proven the inadequacy of our present supply. We must make a decision now or the other. If we don't, we will be just as we are now, then we can let well enough alone, but if we are to progress and meet the needs of a town of 3,000 instead of a hamlet of 1,000 or 1,500 as our present system was planned for, then we must go on the deep end sometime and make a start toward permanent growth and lasting improvement.

It has always been our opinion that the large dam south of town with gravity system for our town was the best solution to our needs. We are not unkindful of the fact

that there are questions of getting living water into the dam and also of ultimately laying three or four miles of large size pipe in order to utilize this system to its full. Even so, we are of the opinion that instead of putting here and there on smaller size pipe that ultimately will have to be scrapped, it would be the part of wisdom to spend toward the accomplishment of the big design which when completed would obviate the cost of pumping and would have the volume and the quality to provide a town several times our size without further worry or enlargement.

There is no gainsaying that immediate expenditures to replace our present mains down Broadway and the two streets east and west would be high, but when the cost of yearly repairs are considered and the dissatisfaction of parts of the town at being without water so much of the time are considered, would it be a high after all? Then too, there is the question of fire protection. Under our present conditions our irrigation canals are about the only protection we have for fires. It would be a fine thing if we could open up our present valve to pressure enough to supply the town with a good stream of water all over, and if we could fill in our irrigation ditches in the main part of town and use our municipal system for lawns and small gardens.

We could really go somewhere in the matter of lawn and street beautification. As conditions are it is next to impossible to have really nice lawns and gardens unless you break the

watering hours and make yourself a lawbreaker.

We are not presenting the remedy for our present situation. However, we do think it time that a serious and conscientious study of the matter be made now so that some plan may be taken to improve it between now and spring. It is almost obtaining money under false pretences for the City Dads to collect \$3.00 per season for lawn water for the amount that anyone can get and still stay within the law. Worse still, our pressure is so low in the mains that residents in the higher sections of town are without water quite a bit of the time which is disconcerting to these people and inconvenient and leaves a bad taste in their mouth. We should be aggressive and progressive and look to a town that will not only cause present citizens to want to remain, but that will offer good water, good sewage, good streets and so on so that others seeking a site for a home will be inclined to settle here. That we have more water, through chlorination is fine, but we want good tasting water that is not so hard, and infinitely more of it. These are questions of the immediate present, not five or ten years from now.

SEEDS, DURING HARVEST

All through the year the fight against weeds goes on. Winter, spring, summer and fall, each season requires constant care. If the land is to be kept clean and the crops given

their full share of light, water and plant food.

Special attention will be needed during the next few weeks to prevent the spread of weeds by farm machinery. To prevent the scattering of weed seeds from field to field and farm to farm all harvesting and threshing machinery and equipment should be well cleaned before moving. If you are operating a combine use tightly woven sacks so that the weed seeds may be taken from the field and burned.

If a separator is used, burn the weed seeds at the setting before turning your live stock into the stable. Even when this precaution is taken a considerable number of weeds of all kinds may be eaten and spread around by the stock. Limit as much as possible the range of live stock on stubble in the fall so that weeds may not be carried to fields other than those on which they were produced.

A little care during harvest and threshing will save considerable work and worry in the future.

Officer (to Sweet Young Thing) — Let me see your driving license. Miss.

Sweet Young Thing — Well, as a matter of fact, officer, I don't happen to have it with me, but if it will save you any bother I can assure you it is very much like any other old driving license.

"GOING MY WAY"

about the things you buy in wartime

Milk IS NOT ELASTIC

Milk is our most valuable food. It must provide us with milk to drink, with butter, cheese, evaporated and concentrated milk and a score of other products.

Canadian farmers have done a magnificent job. They have increased

milk production in 1943 by more than 540 million quarts over 1938.

They have done this in the face of a 25% reduction in farm help, equipment shortages, and the fact that it takes two to three years to bring a calf into milk production.

WHAT HAPPENS TO ALL THIS MILK?

In spite of greater production, the demand for milk and milk products has risen even more, because—

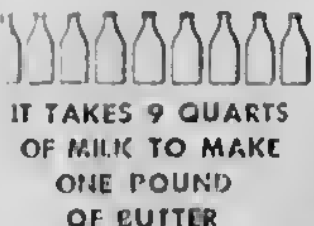

- (a) There's more money to spend;
- (b) More people are working, with changed food habits and increased food needs;

(c) Our Armed Forces and Allies make heavy demands.

It has therefore been necessary by rationing, by subsidies, by careful planning and by other controls—to divert our milk supply into channels most suited to our various food needs.

FLUID MILK TAKES 35% OF OUR MILK

Because fluid milk is regarded by nutritionists as the most nearly perfect food, nothing has been allowed to interfere with its sale. Today, Canadians are drinking more milk and a greater percentage of our milk supply is being consumed as fluid milk—than ever before. Fluid milk has the right of way, but don't waste a drop of it.

BUTTER TAKES 48% OF OUR MILK

In the first three years of war, our butter consumption increased 10.9%. So, rationing was established to prevent too much milk going into butter, at the expense of other important milk products, and to insure a fair share to everyone.

The rationing of butter was influenced by the fact that it has less nutritive value than some other milk products, and because we get a generous supply of fats or their food equivalent in other forms.

To maintain a proper balance of consumption between various milk products and to ensure that butter is put into storage for winter use—when production drops—it is necessary to reduce the ration from time to time.

ICE CREAM AND OTHER MILK PRODUCTS TAKE ABOUT 1 1/2% OF OUR MILK

The manufacture of ice cream is restricted to the 1941 level because milk is needed for other purposes. Milk Powder and Condensed Milk are tak-

ing more milk. Milk sugar is used in the manufacture of Penicillin and for other wartime purposes. Casein (a milk by-product) is used in making glue for aeroplanes.

90% OF THE MILK PRODUCED IN CANADA IS CONSUMED IN CANADA

CHEESE TAKES 10% OF OUR MILK

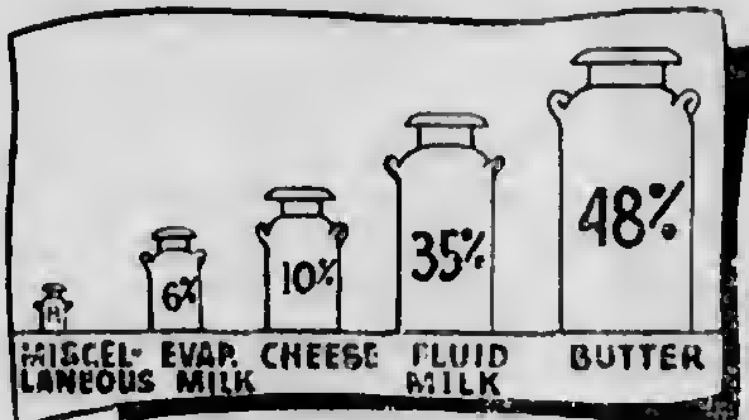

Canada's annual cheese production has gone up by about 37 million pounds since the war.

Cheese is a concentrated food product—easily shipped and stored. That is one reason why we send large quantities to Great Britain to help meet its pressing food needs. While in the last year we exported four of every five pounds of cheese we made, our production has been so increased that we have left for domestic use about three million pounds a year more than before the war.

EVAPORATED MILK TAKES 6% OF OUR MILK

More than twice as much (152 million lbs.) was used by Canadians this last year as in 1938 (74 million lbs.). And yet, there has not been enough.

Where has it all gone? It's an important food for babies—and there are 50,000 more of them a year. Larger quantities have gone to areas where fresh milk is not available. Armed Services have added new demands. In spite of this, our exports of evaporated milk to Great Britain, Newfoundland and the West Indies, etc., are maintained at pre-war level.

Men, Women Over 40
Feel Weak, Worn, Old?

Want Normal Pep, Vim, Vitality?

Does weak, run-down, exhausted condition make you feel faded out, old? Try Dr. King's Kidney Pills. They contain the most powerful kidney stimulants, often needed after 40. A POST WAR NEST EGG

by Dr. Seager Wheeler L.L.D.,
Maple Grove Farm,
Hoshtern, Sask.

As farmer to farmer I am penning this short article.

I was an immigrant boy coming from the south of England in 1885 to secure a free homestead in the Saskatoon district and landed in Moose Jaw in May of that year.

I had to do a man's labour at any kind of work to keep body and soul together until I could secure enough money and make a start on a homestead. After working at all kinds of

jobs I secured a loan of two hundred dollars, giving a lien on my homestead. This amount purchased a team of oxen, a 2nd hand wagon a cheap breaking plow with a cast iron share, a few bags of flour and groceries & with this I trokked 175 miles to Saskatoon. My homestead was some 18 miles north of Saskatoon on the land of the south Saskatchewan river. I landed there on the bare prairie and lived in a tent until I could cut poles and logs for a dugout on the river bank.

But this is not a story of my early life I mention it here to illustrate how I found it necessary to husband my resources to secure my homestead, which I did and later moved to my present farm at Roshtern, Sask., having gone through the school of hard knocks. I early learned to economize, depriving myself of luxuries and bought only such goods as I actually needed.

Now, later in life, during the present war years, I realize the rationing of goods which we sometimes grumble at is a blessing in disguise. It shows us that there are a lot of things we can do without and with no harm to us physically or spiritually. After the first World War price of all farm products were on a high level and money came easily and was soon parted with.

Let us carry in mind the lesson learned in 1929 when prices for farm products dropped to low levels. At the present time I note the tendency to spend freely. Price for farm products are higher than before the war and since the quota for all grain was lifted there is considerably more money in the hands of the farmer than for some years past.

I put aside a nest egg for future requirements. It will be needed in the future. During the war years much of the farm machinery has become worn but we have patched it up as best we could and still harvest good crops. Make your old machinery do as long as it is workable and keep your savings as long as you can do so. It may not be absolutely necessary to buy new machinery. I would strongly urge that as much of your money be invested in a secure liquid reserve as possible. Get

along as well as you can with equipment still in use until the war is over. Once invested it will leave a feeling of security that conduces to contentment, and contentment conduces to health and long life.

I write from my own experience. In the early years, it was a struggle to keep out of debt and what I had was hard to hold. I denied myself many commodities that I needed and later when more successful in this object I never hesitated to purchase equipment I could pay for, and it has always proved a good investment. I write this after fifty years of farming in Saskatchewan.

Canada is still Canada. Governments may come and go, but her rich unbounded natural resources will take care of your investment in her.

P.O. Thurston Smith, son of Mr. and Mrs. S. B. Smith, Raymond, and Miss Alyce daughter of Mr. and Mrs. Alex Peterson, Regina, and formerly of Cardston are being married in the Alberta Temple next Wednesday, Sept. 13th.

P.O. Smith has just returned from overseas and is being posted in Calgary for instructional duties at the Officers Training Camp there. He reports back on September 18th.

LIVE ELEVATORS PROTEST BARLEY EXPORT FILING

Protest has been lodged with the
Government by the Live Elevator
Companies against an order of the
Seeds Administrator prohibiting ex-
port of barley below grade 3 C. W.
is a wire forwarded to Don. J. G.
Gardiner, Minister of Agriculture by
R. R. Emerson, President of The
North-West Live Elevators Associa-
tion. It is contended that the order
is detrimental to western farmers
as the order will result in farmers
being denied the opportunity of ob-
taining the premium procurable for
malting barley.

Following is the wire sent to Mr.
Gardiner:

"Recent orders of Seeds Admin-
istrator prohibiting selection of barley
below grade C.W. for export is ex-
tremely detrimental to producers in-
terest. Weather over west last few
days has been very wet and will
lower barley grades. Malting types
which ordinarily would qualify for top
grades will now be lowered but
shippers will still select these types
for malting purposes with payment
of malting premium. To prohibit the
export of these types denies the pro-
ducer the opportunity for malting
premium. Surely there are plenty of
feed supplies in Canada without pen-
alizing barley producers. We recom-
mend Seeds Administrator be re-
quested to reconsider this decision
and govern his actions by develop-
ments after feed grains commence
to move in volume."

NEWS NOTES

Moses Fromm and Paul Schneider,
Jr. were Calgary visitors by plane
last week. They were detained one
day and had to come back separately.

The students were undergoing ex-
amination:

Teacher—What are the two gen-
ders?

Mrs. Newlywed—Henry, I thought
you told me that your bank loaned
money on notes.

Mr. Newlywed—So it does, dear.

Why?
Mrs. Newlywed— Well, it doesn't
I sent the maid down there with a
for malting purposes with payment
note telling them I wanted to borrow
of \$100 and they wouldn't give it to
her.
